

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

rather unusual yet popular way the more striking features of their probable development." The chapter headings are too numerous to quote in full, but the following will give an idea of the style of treatment: I, A bird's forefathers; II, How did the birds first fly, perhaps? V, The cut of a bird's frock; VI, About a bird's underwear; VII, A bird's outer wrap; VIII, A bird's new suit; IX, 'Putting on Paints and Frills' among the birds; XI, War and weapons among birds; XIV, Freaks of bachelors and benedicts in feathers; XXIII, Tools and tasks among birds; XXV, A little talk on birds' toes; XXVIII, What a bird knows about geography and arithmetic; XXX, A bird's modern kinsfolk.

Mr. Baskett has treated the various topics relating to birds,—their structure, functions and various adaptations,—in a manner likely to interest the general reader, and for the most part has shown a creditable familiarity with his subject. He has, however, a predilection for hypothesis, and thinks every fact relating to habit or structure should be accounted for, and that even a poor theory is better than no theory at all. A good square admission that there are still some things we do not know is not to be tolerated. In the main, however, our author may be taken as a safe leader, and his little book should do much toward enlightening the general reader about birds and their relation to their surroundings. The last 20 pages consist of notes on birds as seen 'Through the Window Pane' of the author's study. The illustrations are largely from Chapman's 'Handbook of Birds of Eastern North America,' to which they are duly credited in the Publishers' Note.—J. A. A.

Chapman's 'Bird-Life', Colored Edition.—In the new edition of Chapman's 'Bird-Life' (see Auk, XIV, July 1897, pp. 336–339) the text has been revised, and the size of the book increased to a full octavo, and the plates enlarged and beautifully reproduced in colors, adding greatly to the value of the work as an aid to the identification of the 100 species thus figured. The publication of 'Bird-Life' in its present form thus well meets the demand for a popular work on our common birds, illustrated with colored plates, at a reasonable price.—J. A. A.

Montgomery's List of the Birds of West Chester, Chester Co., Pa.¹—This is a carefully annotated list of 145 species observed in the immediate vicinity of West Chester, Chester County, Pennsylvania, during the years 1885–91, and 1895–97. Most of the observations were made within an area of only five miles' radius from West Chester, and no species is included in the list which was not either taken by the author or seen by him in the

¹ A List of the Birds of the Vicinity of West Chester, Chester Co., Pennsylvania. By Thomas H. Montgomery, Jr., Ph. D. American Naturalist, 1897, pp. 622–628, 812–814, 907–911.
